Parkinson's Disease: Management Update – a long term view

General Practitioners and Practice Nurses are invited to an education update presented by
Dr Paul Silberstein, Senior Staff Specialist Neurologist
at the Royal North Shore Hospital and Visiting Medical Officer to North Shore Private Hospital

This presentation explores the natural history of Parkinson’s Disease, identifying key clinical features and management of motor and non-motor features in early, mid and late stage PD.

Learning Outcomes:
- Understand and diagnose motor and non-motor features of Parkinson's Disease
- Recognise the natural history of PD, the problems that are likely to arise at different stages and management strategies
- Recognise PD medication side effects, particularly impulse control disorders and manage these appropriately
- Understand the place of advanced therapy options including Apomorphine, Duo-dopa and Deep Brain Stimulation

Dr Paul Silberstein is a Senior Staff Specialist Neurologist at the Royal North Shore Hospital and Visiting Medical Officer to North Shore Private Hospital, Sydney. Dr Silberstein completed Neurology training in Sydney and the Royal Free Hospital, London before undertaking a clinical and research fellowship at the National Hospital for Neurology and Neurosurgery, Queen Square, London where he completed a Doctorate of Medicine.

Since returning from the UK eleven years ago Dr Silberstein's clinical practice focus has been in the management of Parkinson's disease and Movement disorders with a particular interest in Deep Brain Stimulation (DBS). Dr Silberstein is the lead author of the Australian DBS referral guidelines, and has published in Brain and Nature Neuroscience.
