Chronic Pain Management in General Practice

GPs and Practice Nurses will be provided opportunity to work through case examples to develop GP management plans, for the management of chronic and acute pain in General Practice.

Learning Outcomes:
- Understand the mechanisms and paradigm for intervention in acute and chronic pain;
- Review the evidence for the role of opioids in chronic non cancer pain;
- Understand and apply the biopsychosocial approach by utilizing the Quicksteps tool and other resources, accessible through Health Pathways, in developing GP Management Plans.

Presenters:
- Jenni Johnson, Manager Pain Management Network, Agency for Clinical Innovation;
- David Beveridge, Nurse Practitioner, Multidisciplinary Pain Clinic, Northern NSW Local Health District

Note: Participants are encouraged to visit ACI Chronic Pain and NCPHN Mid & North Coast Healthpathways (Medical/Pain Management), prior to attending this training.

(RACGP - Category 2: 5 CPD points)
